## Section 32

### Comparative International Statistics

This section presents summary statistics on the industrial, social, and agricultural organization of the various nations and on finances of international agencies.

The principal source for the data presented in this section is the United Nations *Statistical Yearbook*. Statistics of the individual nations may be found primarily in official publications, generally in the form of yearbooks, issued by most of the nations at various intervals in their own national languages, expressed in their own or customary units of measure. For handier reference, especially for international comparisons, the Statistical Office of the United Nations compiles and issues a number of international summary publications, generally in English and French. Among these are the *Statistical Yearbook*, the *Demographic Yearbook*, the *Yearbook of International Trade Statistics*, the *Yearbook of National Accounts Statistics*, *Population and Vital Statistics Reports* (quarterly), the *Monthly Bulletin of Statistics*, and *The Growth of World Industry: 1953-1966*, Vol. I, *General Industrial Statistics*, and Vol. II, *Commodity Production Data*.

For foreign agricultural, labor, and education statistics, the outstanding sources are publications of specialized agencies of the United Nations, such as the *Productivity Yearbook* issued by the Food and Agriculture Organization, the *Yearbook of Labour Statistics* issued by the International Labour Office, and the *Statistical Yearbook* issued by the Educational, Scientific, and Cultural Organization. These publications usually present data covering an extensive period of time, frequently up to 20 years. The *International Population Statistics Reports*, Series P-90 and P-91, issued by the Bureau of the Census, also present population figures for many foreign countries.

**Statistical coverage.**—Problems of space and availability of data limit the number of countries and the extent of statistical coverage shown here. The list of countries included is based on, but not limited to, the membership rosters of the United Nations and of the larger specialized agencies of the United Nations (see table 1269). In a few instances, member countries were omitted because of an almost complete lack of data.

**OECD, EEC, and EFTA.**—The Organisation for European Economic Co-operation (OEEC), a regional grouping of Western European countries established in 1948 for the purpose of harmonizing national economic policies and conditions, was succeeded on September 30, 1961, by the Organisation for Economic Co-operation and Development (OECD). The OECD consists of the member nations of the former OEEC—Austria, Belgium, Denmark, France, Germany (Federal Republic), Greece, Iceland, Ireland, Italy, Luxembourg, the Netherlands, Norway, Portugal, Spain, Sweden, Switzerland, Turkey, and the United Kingdom—and also Canada, the United States, and Japan, plus Finland and Yugoslavia in a special status category.

The European Economic Community (EEC), or "Common Market," consisting of Belgium, France, Germany (Federal Republic), Italy, Luxembourg, and the Netherlands, was formed in 1958 for the purpose of promoting European economic integration. It is based on agreement among the member nations to stimulate their economic growth, primarily through the gradual elimination of trade barriers among

themselves, the establishment of a common external tariff, the coordination of monetary, fiscal, and agricultural policies, and the removal of restrictions on movement of services, labor, capital, and business enterprises within the community.

The European Free Trade Association (EFTA), established in late 1959, consists of Austria, Denmark, Norway, Portugal, Sweden, Switzerland, the United Kingdom, and, as an associate member, Finland. It represents an agreement among the member nations to promote free trade and economic cooperation in Europe through gradual elimination of tariffs and quotas among themselves but without establishment of a common external tariff.

**Quality and comparability of the data.**—The quality and the comparability of the data presented here are affected by a number of factors:

(1) The year for which data are presented may not be the same for all subjects for a particular country, or for a given subject for different countries, though the data shown are the most recent available. All such variations have been noted. The data shown are for calendar years except as otherwise stated in headnotes or footnotes. Space considerations made it impracticable to present the data for a series of years except for a limited number of subjects.

(2) The bases, methods of estimating, methods of data collection, extent of coverage, precision of definition, scope of territory, and margins of error may vary for different items within a particular country, and for like items for different countries. Footnotes and headnotes to the tables give a few of the major time-period and coverage qualifications attached to the figures; considerably more detail is presented in the source publications. Many of the measures shown are, at best, merely rough indicators of magnitude.

(3) Figures shown in this section for the United States may not always agree with figures shown in the preceding sections. Disagreements may be attributable to the use of differing original sources, a difference in the definition of geographic limits (the 50 States, conterminous United States only, or the United States including certain outlying areas and possessions), or to possible adjustments made in the United States figures by the United Nations in order to improve their comparability with figures from other countries.

**Conversion factors.**—To facilitate comparison in terms of familiar units, items shown in metric units in the source have been converted to U.S. equivalents by means of the abbreviated conversion factors shown below. Additional conversion factors appear in Appendix I, Weights and Measures, pages 923 and 924.

#### CONVERSION FACTORS

<i>Metric units</i>	<i>U.S. equivalents</i>
1 kilometer-----	0.6214 mile
1 square kilometer-----	0.3861 sq. mile
1 kilogram-----	2.2046 pounds
1 metric ton (1,000 kilograms)-----	1.1023 short tons
1 metric ton-kilometer-----	0.6849 short ton-mile
1 hectolitre -----	26.4172 U.S. gallons
1 cubic meter-----	35.3147 cubic feet

## No. 1241. POPULATION AND AREA

[Population data generally are present-in-area estimates for the present territory. For some countries, however, the estimates have been adjusted to include national armed forces and diplomats stationed outside the country and to exclude alien armed forces, foreign diplomats, and enemy prisoners of war stationed within the country. Except as noted, area data include inland waters. See text, p. 826, for general comments concerning the data. For details of methodology, coverage, and reliability, see source]

## No. 1244. ESTIMATES OF GROSS NATIONAL PRODUCT AT MARKET PRICES: 1958 TO 1967

[For most countries estimates prepared by converting official figures to U.S. dollars at prevailing dollar exchange rates. Per capita data generally based on mid-year population estimates. These estimates should be considered as indicators of production of goods and services of countries represented and not as standard of living measures of their inhabitants. Small differences between any 2 countries may be due to margin of error inherent in method of estimation. See text, p. 826 for general comments concerning the data; for details, see source.]

<sup>1</sup> Refers to crop year ending in 1967, except as noted. All commodities index relates to food, fibers, tobacco, industrial oil seeds, rubber, tea, and coffee; food index relates to crops and livestock products for human consumption. Deduction made for feed and seed used in production process.

<sup>2</sup> Components of these indexes vary considerably among countries; for details, see source.

<sup>3</sup> Refers, in general, to salaried employees and wage earners in manufacturing. Includes workers on holiday or vacation; excludes employers, self-employed, workers on strike, on temporary military leave, or temporarily laid off. <sup>4</sup> In many instances, represents index only for principal city (or cities) of particular country.

<sup>5</sup> General wholesale price index numbers usually weighted by gross value of sales on wholesale markets.

<sup>6</sup> As of 3d quarter of 1968, except as noted. Indexes based primarily on common shares traded on leading exchange or exchanges of each country, and intended to cover representative sample of companies in manufacturing, mining, and construction fields. In some cases, where an index of industrial shares is not available, a general index, including shares of companies in transportation, distribution, and finance fields, is reported. <sup>7</sup> For 1966. <sup>8</sup> For 1964.

<sup>9</sup> Wage earners only. <sup>10</sup> 1958=100. <sup>11</sup> For year beginning July 1.

<sup>12</sup> Home consumption of foodstuffs and industrial raw materials. <sup>13</sup> Basic materials.

<sup>14</sup> For year ending June 30. <sup>15</sup> Includes mining and quarrying. <sup>16</sup> 1964=100. <sup>17</sup> General index.

<sup>18</sup> Luxembourg included with Belgium. <sup>19</sup> October 1962–September 1963=100. <sup>20</sup> Farm products only.

<sup>21</sup> For 1962. <sup>22</sup> Data for one month. <sup>23</sup> For 1965. <sup>24</sup> 1965=100. <sup>25</sup> Area of San Salvador.

<sup>26</sup> Includes mining. <sup>27</sup> Guatemala City only. <sup>28</sup> Producers' price of industrial products.

<sup>29</sup> For year beginning Mar. 21. <sup>30</sup> Average of less than 12 months. <sup>31</sup> Includes working proprietors.

<sup>32</sup> Covers commercial establishments of retail and wholesale trade. <sup>33</sup> For year beginning Apr. 1.

<sup>34</sup> July 1962–June 1963=100. <sup>35</sup> 1966=100. <sup>36</sup> Includes sea fishing. <sup>37</sup> 2d quarter.

<sup>38</sup> State retail prices. <sup>39</sup> None or negligible quantity. <sup>40</sup> Residential building materials.

<sup>41</sup> June 30, 1966=100.

NA Not available.

<sup>1</sup> Except as noted, data are for a specified date in 1960 or 1961; includes unemployed.

<sup>2</sup> Comprises utilities generating primarily for public use, plus industrial establishments generating primarily for own use. Relates to production at generating centers, including station use and transmission losses.

<sup>3</sup> Based on apparent consumption of coal, lignite, petroleum products, natural gas, and hydro-electricity.

<sup>4</sup> Relates to production, including repair work in factories; generally excludes mining, building and construction, and public utilities.

<sup>5</sup> Coverage varies widely. For most countries, refers to single plants or factories with more than a specified number of employees, as noted. For additional or alternative qualifications, see source.

<sup>6</sup> Comprises a average number of paid employees, working proprietors, unpaid family workers, and homeworkers, except as noted.

<sup>7</sup> Covers merchandise including silver (except current coin); excludes gold and issued paper currency. Imports generally valued c.i.f.; exports, f.o.b. Generally includes government trade (including foreign aid, war reparations, and military goods), trade of foreign concessionaires, and postal trade. See source for "general trade" or "special trade" distinctions. Roughly half the countries shown fall into each category, thus affecting comparability.

<sup>8</sup> Excludes trade of China (mainland), Mongolia, North Korea, and North Vietnam with one another.

<sup>9</sup> Imports and exports include Puerto Rico. <sup>10</sup> Excludes Armed Forces abroad.

<sup>11</sup> Net production (excluding station use). <sup>12</sup> For 1963. <sup>13</sup> Establishments with 1 or more employees.

<sup>14</sup> Paid employees. <sup>15</sup> F.o.b. <sup>16</sup> Includes foreign aid. <sup>17</sup> For 1966. <sup>18</sup> For 1964.

<sup>19</sup> Year ending June 30. <sup>20</sup> Establishments with 4 or more engaged. <sup>21</sup> For 1962.

<sup>22</sup> Luxembourg included with Belgium. <sup>23</sup> For 1961. <sup>24</sup> Excludes homeworkers.

<sup>25</sup> Establishments with 5 or more engaged. <sup>26</sup> For 1965. <sup>27</sup> Establishments with 10 or more employees.

<sup>28</sup> Establishments with 5 or more employees. <sup>29</sup> Excludes armed forces and unpaid family workers.

<sup>30</sup> Establishments with 6 or more employees. <sup>31</sup> Registered establishments. <sup>32</sup> Year ending in September.

<sup>33</sup> Establishments with 10 or more engaged. <sup>34</sup> Excludes trade with Federal Republic of Germany.

<sup>35</sup> For 1960. <sup>36</sup> Man-years. <sup>37</sup> Year beginning Apr. 1. <sup>38</sup> Establishments with 10-49 workers if using power or 20-99 workers if not using power. <sup>39</sup> Public utility plants only. <sup>40</sup> Consumption.

<sup>41</sup> Includes peat. <sup>42</sup> Establishments with 3 or more engaged. <sup>43</sup> Establishments with 2 or more engaged.

<sup>44</sup> Establishments with annual value of production exceeding 12,000 cordobas.

<sup>45</sup> Establishments with 20 or more employees. <sup>46</sup> Excludes persons in institutions and armed forces.

<sup>47</sup> Includes Canary Islands and possessions in North Africa. <sup>48</sup> Includes Canary Islands and Ceuta.

<sup>49</sup> Excludes homeworkers and unpaid family workers.

<sup>1</sup> Excludes lignite and brown coal, except as noted.<sup>2</sup> Source presents data in metric tons. Conversion to barrels allows for differences in specific gravity of petroleum.

Figures refer to crude petroleum including shale oil, but excluding natural gasoline.

<sup>3</sup> Covers, as far as possible, all hydraulic cements used for construction (portland, metallurgic, aluminous, natural, etc.).<sup>4</sup> Refers generally to iron content of marketable ores mined, including manganeseiferous iron ores but excluding pyrites. Some data are rough estimates obtained by applying a fixed percentage to figures for crude ore production.<sup>5</sup> Data expressed in terms of pure (monohydrate) sulfuric acid and include sulfuric acid equivalent of oleum or fuming acid.<sup>6</sup> Total production of crude steel, both ingots and steel for castings. Excludes wrought (puddled) iron.<sup>7</sup> Data represent apparent consumption (i.e., production plus imports minus exports) and do not take into account changes in stocks.<sup>8</sup> Excludes manganeseiferous iron ores containing 5 percent or more of manganese.<sup>9</sup> Excludes steel for castings made in foundries operated by companies not producing ingots. <sup>10</sup> For 1966.<sup>11</sup> Includes wastes. <sup>12</sup> Year ending June 30. <sup>13</sup> Excludes natural cement.<sup>14</sup> Luxembourg included with Belgium. <sup>15</sup> Strength of acid not reported.<sup>16</sup> Represents about 90 percent of the total national output. <sup>17</sup> Excludes alloy steels. <sup>18</sup> For 1965.<sup>19</sup> Shipment from mines. <sup>20</sup> Ingots only.<sup>21</sup> Includes lignite; for Japan, also includes a small amount of brown coal.<sup>22</sup> For 1960. <sup>23</sup> For 1959. <sup>24</sup> Includes Manchuria.<sup>25</sup> Excludes sulfuric acid for superphosphate production. <sup>26</sup> For 1961. <sup>27</sup> Includes regenerated sulfuric acid.<sup>28</sup> Year beginning in March. <sup>29</sup> Includes iron content of iron sand and pyrites.<sup>30</sup> Production in "Neutral Zone" shared by Kuwait and Saudi Arabia amounted to 151,458 barrels.<sup>31</sup> Sarawak only. <sup>32</sup> West Malaysia only. <sup>33</sup> Svalbard; Norwegian-operated mines only.<sup>34</sup> None or negligible. <sup>35</sup> Shale oil. <sup>36</sup> Refers to Sheikdom of Abu Dhabi.<sup>37</sup> Great Britain only. Excludes production at quarries. <sup>38</sup> For 1964.Source: Statistical Office of the United Nations, New York, N.Y.; *Statistical Yearbook*. (Copyright.)

<sup>1</sup> As of June 30. Represents gross registered tons (see text, p. 566) for vessels of 100 gross tons and over. Excludes vessels without mechanical means of propulsion; includes sailing vessels with auxiliary power. Excludes ships trading on Caspian Sea.

<sup>2</sup> In general, represents sum of net registered tonnages (see text, p. 566) of seagoing foreign and domestic merchant vessels (power and sailing) entered with cargo from a foreign port and refers to only one entrance for each foreign voyage. Where possible, excludes vessels "in ballast," i.e., entering without unloading goods.

<sup>3</sup> Represents weight of all goods (including their packing) in external trade loaded to and unloaded from seagoing vessels of all flags at ports of country specified. For most countries, excludes bunkers, ships' stores, ballast, and transhipment (goods transshipped from an importing vessel to an exporting vessel).

<sup>4</sup> Relates to domestic and international traffic on all railway lines within each country shown, excluding railways entirely within an urban unit and plantation, industrial mining, funicular and cable railways. In general, passenger miles include all passengers except military, government, and railway personnel when carried without revenue; ton-miles relate to freight net ton-miles and include all goods whether carried by fast or ordinary trains except service traffic, mail, baggage, and nonrevenue governmental stores.

<sup>5</sup> Covers both domestic and international scheduled services operated by companies registered in each country. Includes supplementary services occasioned by overflow traffic on regularly scheduled trips and preparatory flights for new scheduled services.

<sup>6</sup> Represents officially estimated number of vehicles in use. Includes passenger cars and commercial vehicles. For most countries shown, excludes 2- and 3-wheeled cycles and motorcycles, trains, trolley buses, ambulances, hearses, military vehicles, police and special purpose or government security vehicles, trailers, and farm tractors.

<sup>7</sup> Includes Great Lakes.

<sup>8</sup> After time adjustment, loaded approximately same as unloaded.

<sup>9</sup> Excludes China (mainland), North Korea, and North Vietnam.

<sup>10</sup> Includes Great Lakes international traffic. <sup>11</sup> Year ending June 30.

<sup>12</sup> For 1957. <sup>13</sup> All entrances counted.

<sup>14</sup> Year ending Sept. 30. <sup>15</sup> For 1959.

<sup>16</sup> Includes Great Lakes and St. Lawrence international traffic. <sup>17</sup> For 1960.

<sup>18</sup> For 1961. <sup>19</sup> For 1965. <sup>20</sup> Year beginning Apr. 1. <sup>21</sup> Passenger cars only.

<sup>22</sup> Year beginning Mar. 21. <sup>23</sup> For 1964. <sup>24</sup> Year beginning July 1.

<sup>25</sup> Excludes Azores and Madeira Islands. <sup>26</sup> Commercial vehicles only.

<sup>27</sup> Namibia (formerly South West Africa). <sup>28</sup> Includes the Balearic Islands, Ceuta, and Melilla.

<sup>1</sup> Comprises public and private telephones (including extension instruments) connected to a central exchange. World total in 1967 estimated at 222.4 million.

<sup>2</sup> Comprises generally all types of telegrams including cablegrams and radiograms, but excludes messages in transit.

<sup>3</sup> Items mailed for distribution within national territories. Comprises letters, postcards, printed matter, merchandise samples, small packets, and phonopost packets. Includes mail carried without charge, but excludes ordinary packages, and insured letters and boxes.

<sup>4</sup> Publications containing general news and appearing at least 4 times a week; may range in size from a single sheet to 50 or more pages. Circulation data include copies sold outside the country.

<sup>5</sup> Number of licenses issued for receiving sets except as noted. Figures should be used with caution as number of licenses fails, in varying degrees from country to country, to represent full number in use. Data apply to all types of receivers for radio broadcasts to the public, including loudspeakers connected to a "radio redistribution system" but excluding television sets. World total in 1966 estimated at 601 million sets in use; 1967 data not available.

<sup>6</sup> Number of licenses issued for receiving sets except as noted. World total in 1967 estimated at 215 million sets in use.

<sup>7</sup> Telegrams exclude Hawaii.

<sup>8</sup> Includes messages to and from Canada, Mexico, St. Pierre, and Miquelon.

<sup>9</sup> Domestic and foreign, including ordinary packages and mail with a declared value.

<sup>10</sup> Domestic and foreign, including ordinary packages and mail with a declared value.

<sup>11</sup> English dailies only. <sup>12</sup> Estimated number of receivers in use.

<sup>13</sup> For 1966. <sup>14</sup> For 1965. <sup>15</sup> For 1964. <sup>16</sup> For 130 dailies only. <sup>17</sup> For 12 dailies only.

<sup>18</sup> For 1962. <sup>19</sup> Year beginning Apr. 1. <sup>20</sup> Includes foreign, received and sent.

<sup>21</sup> English and French language dailies only. <sup>22</sup> Years ending Sept. 30. <sup>23</sup> For 1963.

## No. 1267. HOUSING AND HEALTH

**Housing:** Data generally intended to refer to conventional (permanent) dwellings only. For some countries, however, data include nonpermanent structures, improvised shelters, and mobile trailers, or, as noted, refer to housing units and to household accommodation (the space occupied by a private household) rather than to dwellings. **Health:** Hospital data refer to hospitals and other medical establishments with beds but exclude old people's homes and establishments for custodial or preventive care only; personnel data refer to persons fully qualified from medical or dental schools and working within the country. See text, p. 826, for general comments concerning the data. For additional qualifications of data for individual countries, see source.

## No. 1267. HOUSING AND HEALTH--Continued

**Housing.** Data generally intended to refer to conventional (permanent) dwellings only. For some countries, however, data include nonpermanent structures, improvised shelters, and mobile trailers, or, as noted, refer to housing units and to household accommodation (the space occupied by a private household) rather than to dwellings. **Health:** Hospital data refer to hospitals and other medical establishments with beds but exclude old people's homes and establishments for custodial or preventive care only; personnel data refer to persons fully qualified from medical or dental schools and working within the country. See text, p. 826, for general comments concerning the data. For additional qualifications of data for individual countries, see source.]

### Metropolitan Area Statistics

Statistics from various Federal Government and private sources are presented here for areas officially defined as standard metropolitan statistical areas (SMSA's) by the U.S. Bureau of the Budget in *Standard Metropolitan Statistical Areas*, 1967. As of July 1, 1969, there were 233 SMSA's. The three SMSA's in Puerto Rico are not included here because data for many of the items shown are not available for them. Area titles and definitions appear on pages 919-922.

Two tables form the basic framework of this section: Table 1 presents 165 items of information for the 110 SMSA's of 250,000 inhabitants or more in 1960; table 2 shows 103 items for the remaining SMSA's of fewer than 250,000 inhabitants in 1960. Population estimates for 1966 show that, from 1960 to 1966, the number of areas with more than 250,000 inhabitants increased to 125. During that period, 14 SMSA's rose above the 250,000 level, 1 fell below. In addition, 2 New England SMSA's, which were well below the 250,000 mark in 1960, were ranked among those above it because they were ranked as SEA's in 1966 (see below). Area population rankings shown in both tables are based on 1966 estimates.

For New England, data are shown for both metropolitan State economic areas (SEA's) and SMSA's wherever it was possible to do so. SEA's consist of single counties or groups of counties; SMSA's in New England, of towns and cities. SEA data are included here for New England because, for a large number of items shown, only county data are available to serve as a basis for metropolitan area figures.

The Bureau of the Budget first issued standard definitions of metropolitan statistical areas in 1949. Generally conceived, a metropolitan area is an integrated economic and social unit with a large population nucleus. Each SMSA contains at least:

- (a) One central city with 50,000 inhabitants or more, or
- (b) Two cities having contiguous boundaries and constituting, for general economic and social purposes, a single community with a combined population of at least 50,000, the smaller of which must have a population of at least 15,000.

The SMSA includes the county in which the central city is located, and adjacent counties that are found to be metropolitan in character and economically and socially integrated with the county of the central city. In New England, the requirement with regard to a central city as a nucleus still holds, but, as noted above, the units comprising the area are towns rather than counties. The county (or town in New England) is the basic statistical unit. An SMSA may contain more than one city of 50,000 inhabitants. The largest city is always included in the title of the area; however, the title may include the names of one or two additional cities. An SMSA may cross State lines.

Reprints of this section of the *Statistical Abstract* may be obtained from the Superintendent of Documents, Washington, D.C. 20402. The price per copy is 35 cents; a 25-percent discount is allowed on orders of 100 copies or more sent to the same address.
